Nandish Gowda Abbur Srikantaiah

Systems Engineer | MBSE | SysML | Cameo | DOORS

Mobile: (+49) 017626450134 **E-Mail:** nandish0721@gmail.com

Nationality: Indian **Availability:** Immediate

LinkedIn: www.linkedin.com/in/nandish-gowda-a-s

Address: Annabergstraße 6, Bad Cannstatt, 70374 Stuttgart - BW, Germany

Profile

Systems Engineer with hands-on experience in Model-Based Systems Engineering (MBSE) for complex technical systems. Experienced in SysML-based system modelling, system architecture, system decomposition, and traceability between requirements, system elements, and verification artefacts. Skilled in applying MBSE workflows in industrial projects using Cameo, DOORS, and Polarion, while supporting multidisciplinary teams through structured system models and stakeholder-oriented views.

Core Competencies

MBSE | SysML | Cameo Systems Modeler | System Architecture | System Decomposition | Traceability | Requirements Engineering | IBM DOORS | Polarion | Verification & Validation | Interface Modelling | Technical Documentation | Systems Integration | Multidisciplinary Collaboration

Experience

Internship

Systems & Requirements Engineering in Virtual Testing

Bosch Home Comfort, Wernau

03.2025 - 08.2025

- Developed SysML-based system models to support system decomposition and architecture understanding in Cameo
- Integrated requirements, system models, and verification artefacts within a structured MBSE workflow using DOORS and Jira
- Supported system-level testing and verification using MATLAB/Simulink
- Collaborated with multidisciplinary engineering teams to maintain traceability between requirements, models, and verification activities

Master Thesis

Model Based Product Line Engineering

Bosch Home Comfort, Wernau

07.2024 - 12.2024

- Developed an MBSE SysML based product line engineering approach for configurable heat pump systems
- Modelled system variability and feature structures throughout system lifecycle
- Integrated requirements artefacts to system models and traceability workflows
- Master's Thesis grade - 1.1 (sehr gut)

Internship

Requirements Engineering

Bosch Home Comfort, Wernau

12.2023 - 06.2024

- Developed 'Dry Run' pilot requirements project and supported definition and documentation of system requirements for HVAC development projects
- Created and managed requirements libraries and reviews them in Jira
- Assisted in change and configuration management of requirements
- Managed requirements traceability through matrices and active linking

Production Engineer

Saft India (Total AG), Bengaluru

04.2019 - 08.2021

- Supported research and development of Ni-Cd and Li-ion battery packs.
- Co-supervision of manufacturing and development tasks.

Education

Master of Science in Systems Engineering for Manufacturing

Otto von Guericke University (OVGU), Magdeburg
10.2021 - 09.2025
Master's Thesis: Feature Modelling and Variability Management in Production Systems Engineering (MBPLE)
Grade - 1.65

Bachelor of Engineering in Mechanical Engineering

Visvesvaraya Technological University (VTU), Bengaluru, India
08.2013 - 07.2017
Bachelor's Thesis: Design Optimisation of a Centre Fuselage Jig for Ammunition Box Installation
Grade - 2.1

Academic Projects

- **Zero-G RC Aircraft Project:** Applied V-Model for System definition, modeling, verification and validation.
- **Virtual commissioning in Systems Engineering with RealVirtual.io (Hi-Wi)**: Supported academic digital twin projects through system documentation and MBSE structuring, in collaboration with university supervisors.

Language Skills

- **English:** Fluent (C1/C2)
- **German:** Intermediate (B1/B2)
- **Hindi:** Intermediate (B2)
- **Kannada:** Native (C2)

Technical Skills

- **Modelling and Simulation**: SysML, UML, Cameo Systems, MATLAB, Simulink, RealVirtual.IO, Enterprise Architect
- **Requirements Management**: IBM DOORS, Jira R4J, Polarion
- **Programming**: Python, C, LSTM-based Machine Learning
- **CAD & Analysis**: CATIA, Hypermesh, Ansys
- **Data visualisation and PLE**: Power BI, Pure::Variants

Certifications, Publications and Engagement

- IREB CPRE - Foundation Level (Requirements Engineering)
- MBSE Methods and SysML Best Practices (Coursera)
- ***Frugal Engineering and the Impact of Frugal Engineering on Complex Engineering Practices*** - A publication Otto-von-Guericke University Magdeburg, Faculty of Mechanical Engineering
- Vice President - Business Development, DEGIS e.V., Magdeburg
  Responsible for coordination of student initiatives and collaboration with academic and industry stakeholders
